

A new development of Steriwave-Altimed Company is a device for contactless impact ATM - Helper-BRT-personal-m, which includes 100 unique modes specially selected for the most common diseases. The device is equipped with a powerful generator of threads that will easily get rid of the disease. The device has a convenient and simple interface, which can be used even by a child. To simplify your work with the device we made a function Last-Use (remembers the mode you used last, and gives you the possibility to use it again after a new start, which means you do not need to search for it in the list). The device includes 100 base functions which it is possible to use in combination:

- | | | |
|------------------------------|-------------------------------|--------------------------------|
| 00. Tonus | 35. Dizziness | 72. Eczema |
| 01. Sedative | 36. Glaucoma | 73. Ovarian dysfunction |
